

## Data Sheet Zeolite Body Lotion

### NATURAL BODY CARE WITH ZEOLITE, AVOCADO OIL AND SHEABUTTER

Our zeolite body lotion has been developed based on natural raw materials. The classic detoxification specialist zeolite is supplemented in this by the highly recommended skin care products sheabutter and avocado oil. Our zeolite body lotion contains neither silicone, parabens nor palm oil.

Avocado oil is characterised by good penetration into the skin, hydrating action and markedly positive skincare effects. It promotes cell regeneration and is used for dry, chapped and barrier-damaged skin. Its high concentration in palmitoleic acid guarantees its compatibility with sensitive and bad skin conditions. Phytosterols help support the barrier function of the skin, as they are similar to the molecular structure of the cholesterol contained in the skin, it can replace it and stimulate cell production. Vitamins A and E can also be found here.

Sheabutter is a valuable skin care agent and has a high concentration of natural allantoin, vitamin E and carotene. It is good for oil replenishment, it smooths and helps heal skin inflammation.

- A gentle complex of natural ingredients
- Sheabutter and avocado oil are kind to the skin

- free of synthetic scents, flavours and preservatives
- without nano particles

### CONTENTS AND PACKAGING

150 ml Zeolite body lotion in a tube with screw-on cap, without outer packaging, produced purs. to cosmetics regulations.

### INGREDIENTS

Zeolite, sheabutter, avocado oil

### INGREDIENTS - EXPLANATION OF THE INGREDIENTS

AQUA	Water - base ingredient
ZEOLITE	Natural mineral, hazardous-substance binding, antiviral, antibacterial, anti-inflammatory
CAPRYLIC/CAPRIC TRIGLYCERIDE	plant-based triglyceride solvent, makes the skin smooth, dispersing agent
CITRUS AURANTIUM DULCIS (ORANGE) FRUIT WATER	Orange oil provides the skin with volatile ingredients, trace elements and mineral salts that are decisive in catalysing enzymatic activities.
BUTYROSPERMUM PARKII (SHEA) BUTTER	Sheabutter - the fat extracted from fruit of the shea tree, soothing to the skin, softens the skin, protects the skin. Penetrates the skin well, good for oil replenishment, supports the skin's water binding properties.
PERSEA GRATISSIMA (AVOCADO) OIL	Avocado oil is rich in phytosterol, lecithin, minerals and vitamins (A, B1, B2). Its palmitoleic acid concentration is important. Avocado oil is absorbed well by skin and fights cornification.
CETEARYL ALCOHOL	Plant-based emulsifying agent to stabilise and blend liquids, to smoothen, to dull, to stimulate viscosity.
SODIUM CETEARYL SULFATE,	plant-based emulsifying agent (source of natural waxes)
PALMITIC ACID	plant-based skin care product, consistency enhancer
STEARIC ACID	Emulsifying agent, stabilises, good for oil replenishment, cleanses
POTASSIUM SORBATE	Preservative, potassium sorbate (E202) is the potassium salt of the sorbic acid and is used as a preservative in both the cosmetics and food industries. It is harmless as an alternative for parabens, since the human body metabolises it into water and CO <sup>2</sup> . It protects cosmetic products from yeasts and moulds and it very compatible with the skin.
SODIUM BENZOATE	Preservative, sodium benzoate (E211) is the sodium salt of benzoic acid. It is approved as a food additive and inhibits the development of microorganisms in cosmetic products.
XANTHAN GUM	plant-based swelling agent, emulsion stabiliser and consistency enhancer.
LACTIC ACID	Lactic acid for a smoothness you can feel, seals in moisture in the skin; nourishes the skin.

Status 10/2017
